

Hybrid Intersections of Connectivity with JUNO

junolive.co

MEETING & EVENT LEADERS ARE MOVING QUICKLY

THE FUTURE IS HYBRID

HYBRID IS THE INTERSECTION OF CONNECTIVITY

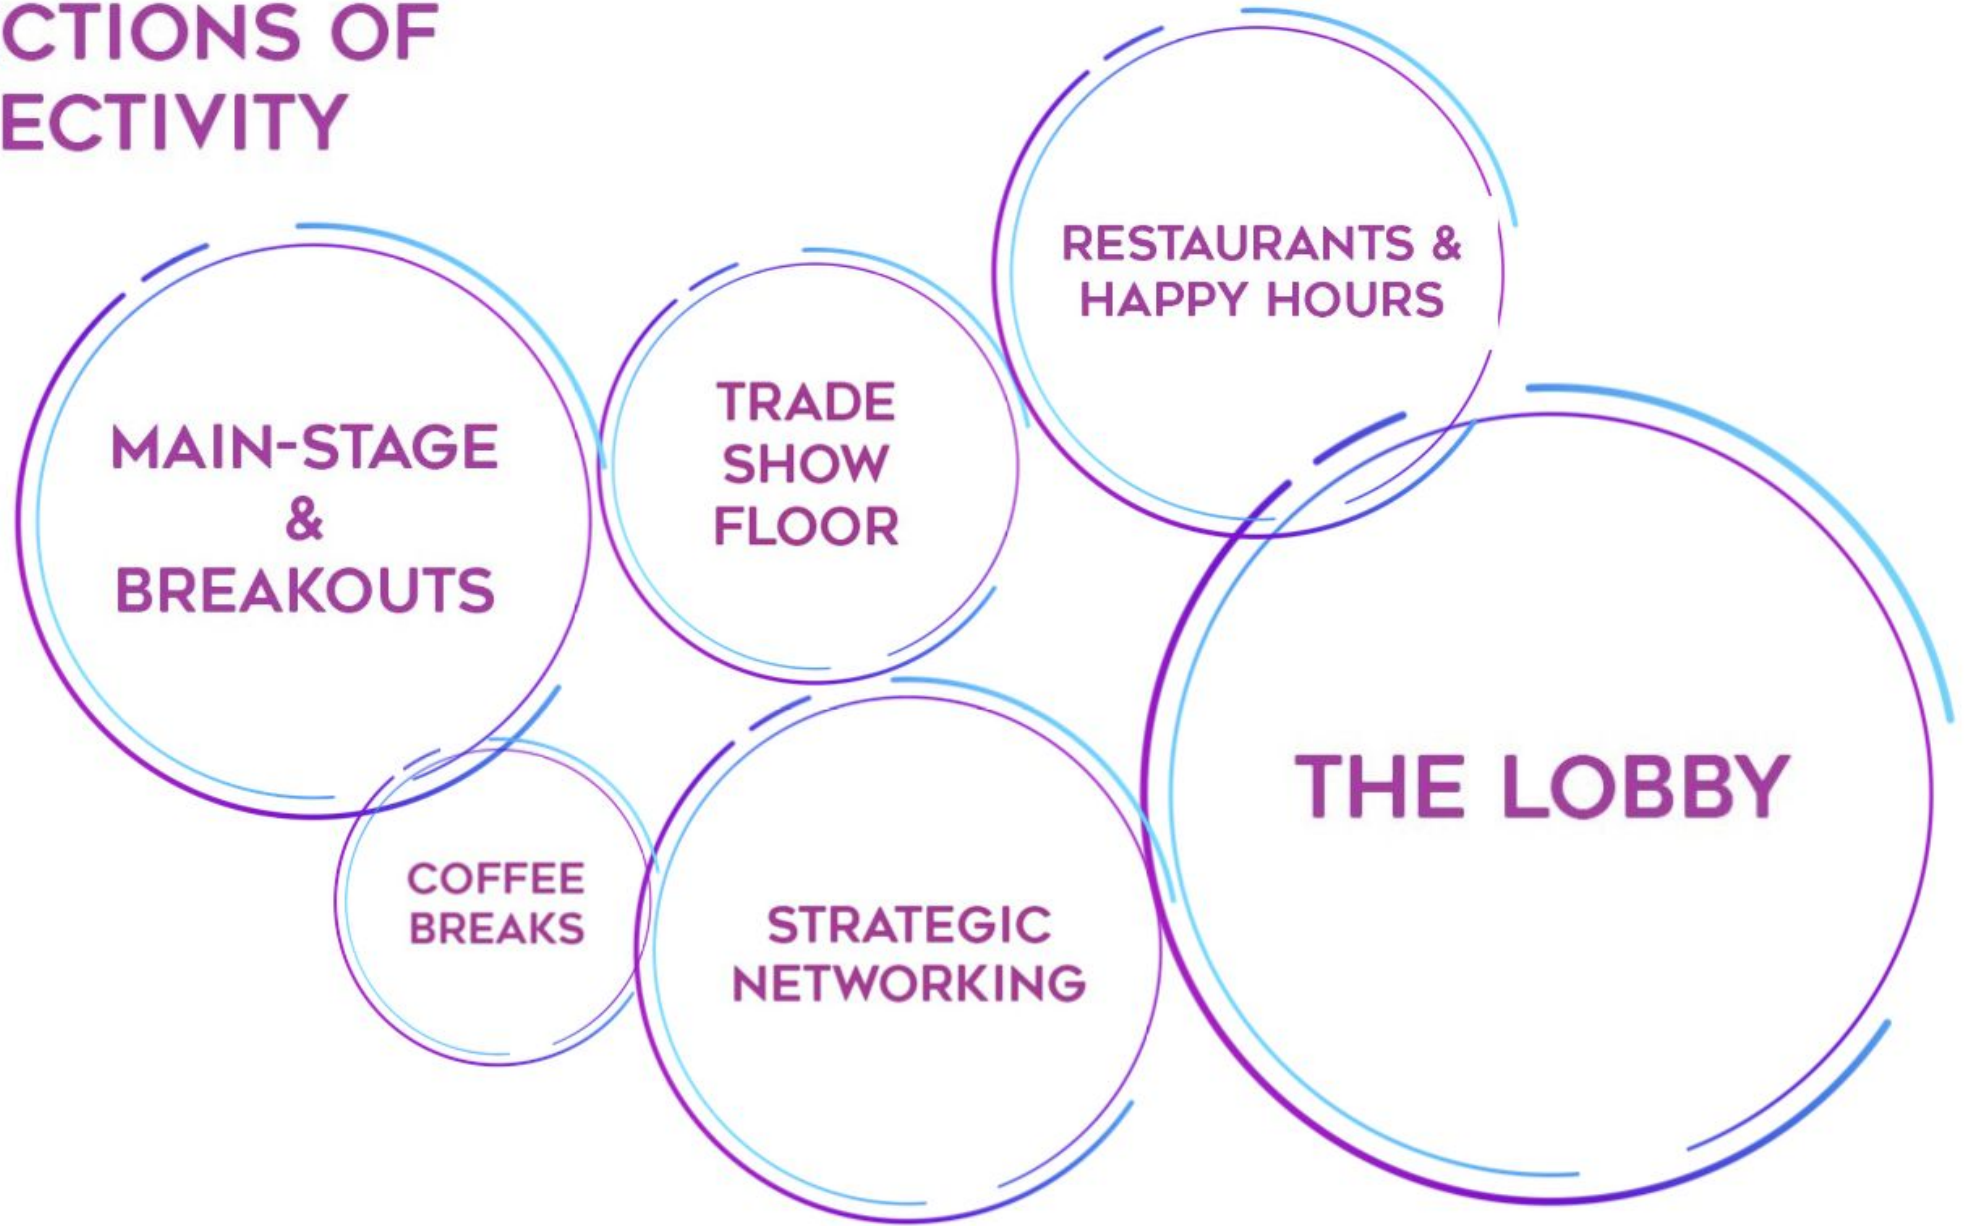

At JUNO we call these blending moments ***intersections of connectivity***. They are moments in which the physical and virtual experience come together in a serendipitous moment! They represent audiences crossing each others' paths in omnichannel events

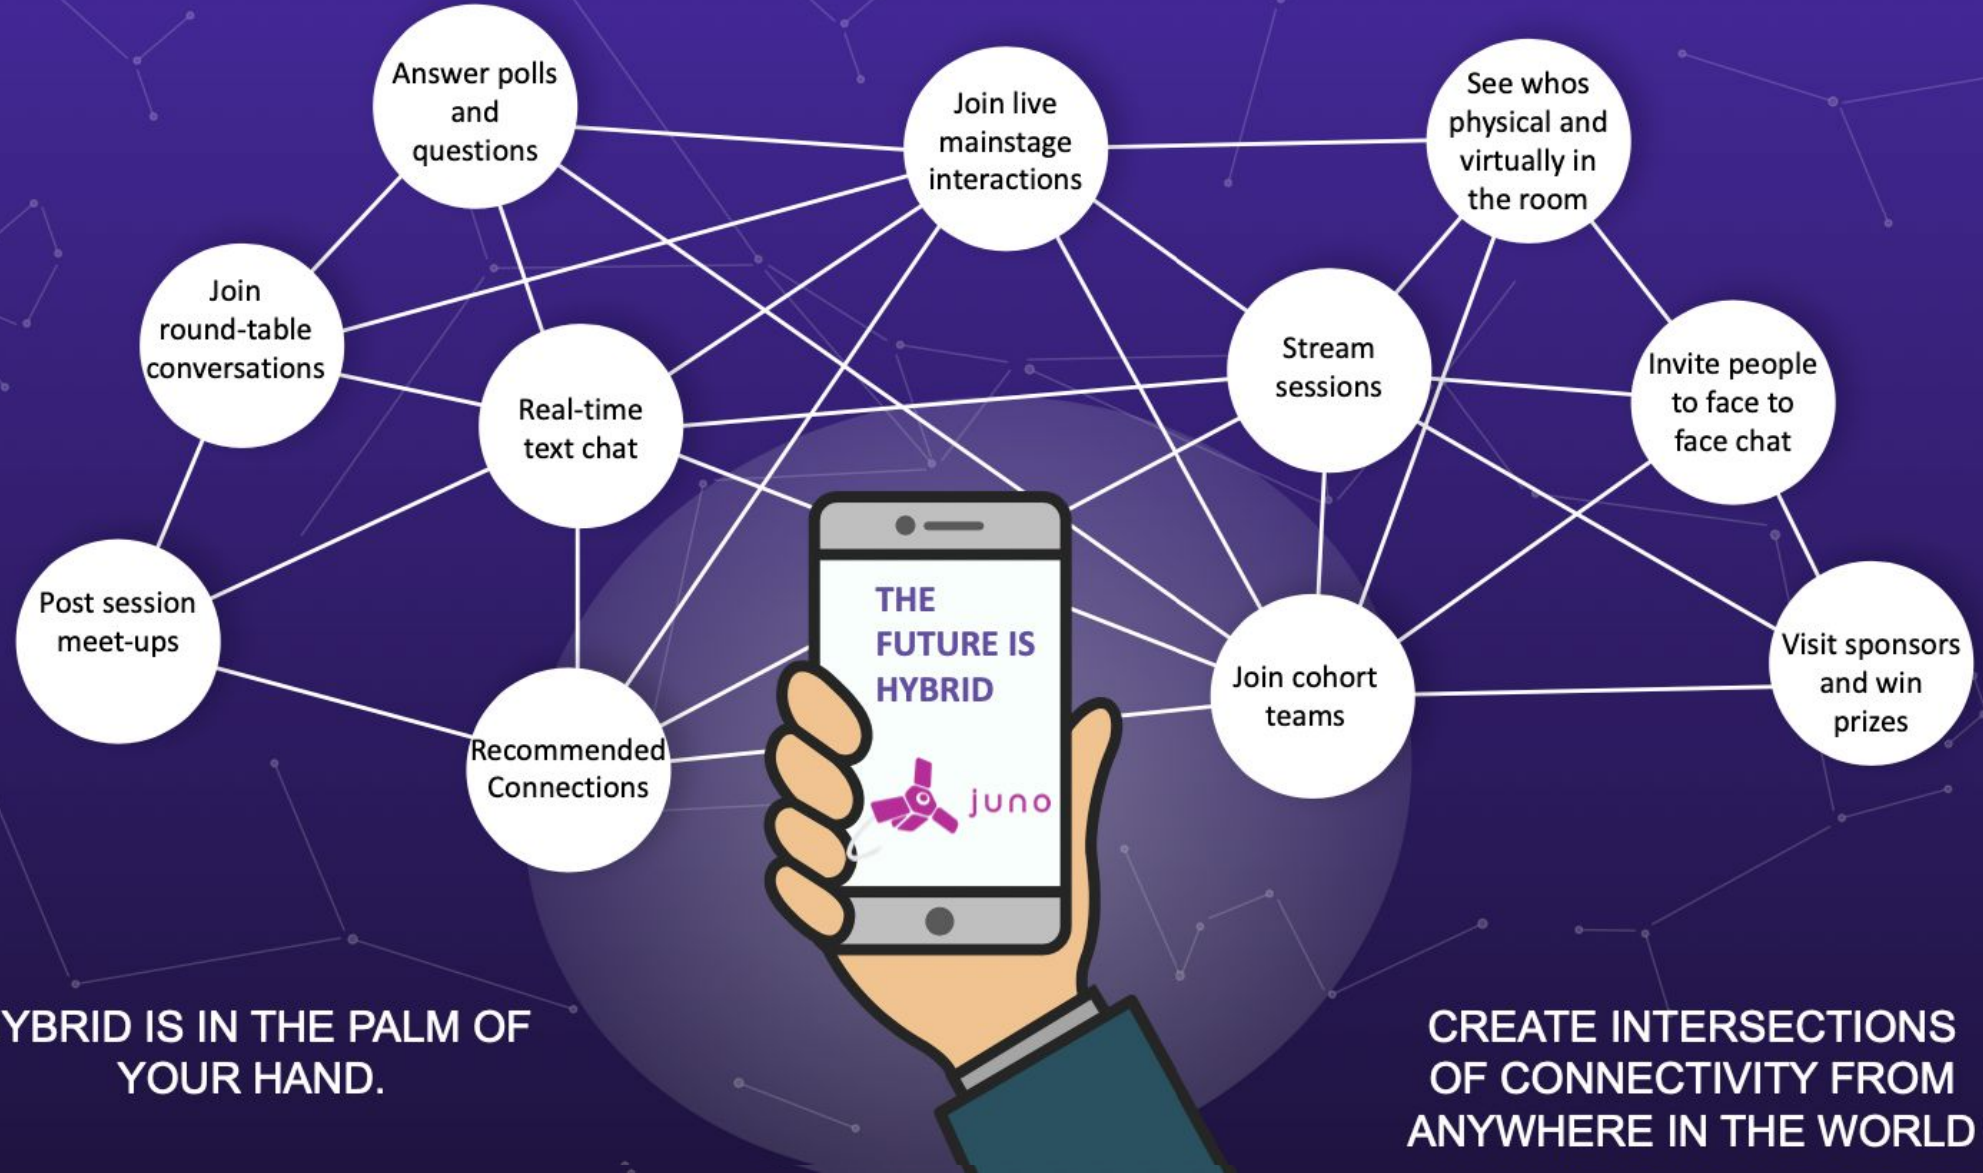

There are, however, challenges with these new found intersections of connectivity.

- How do you **identify** these intersections?
- How do you **create** connectivity?
- How do you **sustain** these moments?
- How do you **monetize** the intersections of connectivity?

INTERSECTIONS OF CONNECTIVITY

From the living room or the ballroom, HYBRID in boundaryless

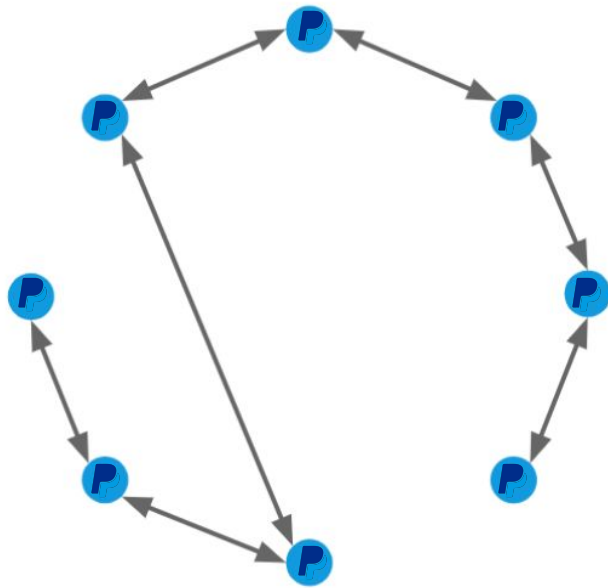

HYBRID IS IN THE PALM OF
YOUR HAND.

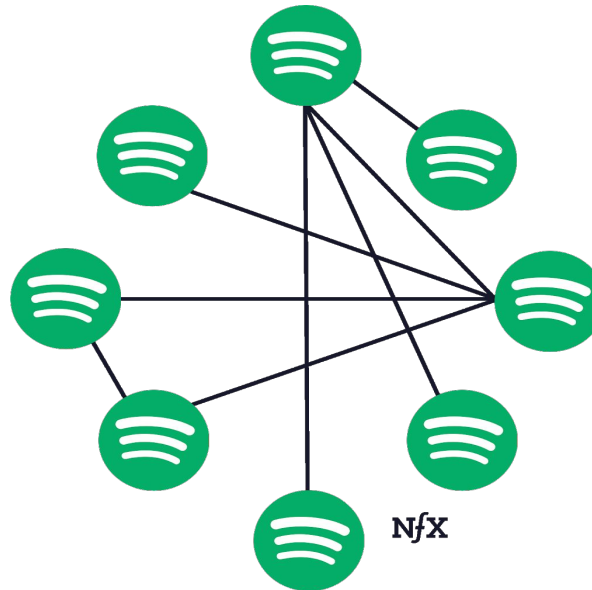

CREATE INTERSECTIONS
OF CONNECTIVITY FROM
ANYWHERE IN THE WORLD

Think about intersections and network density

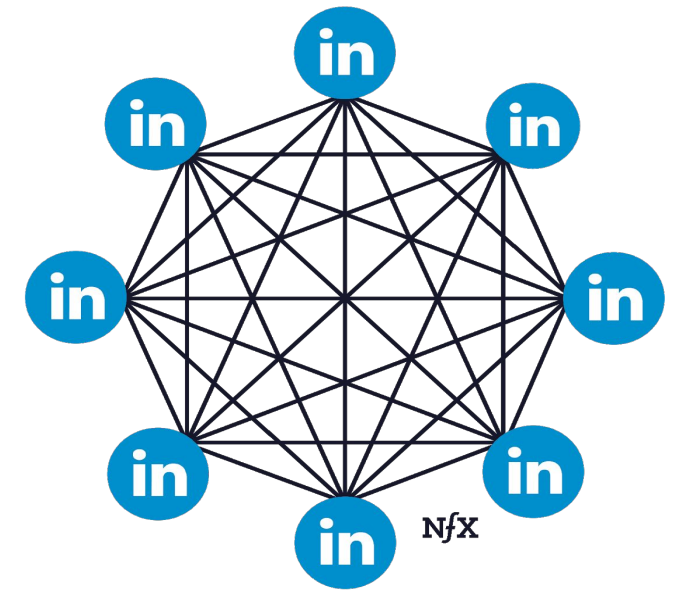

Sparse 1:1 network density
Think Paypal

Low network density
Think Spotify

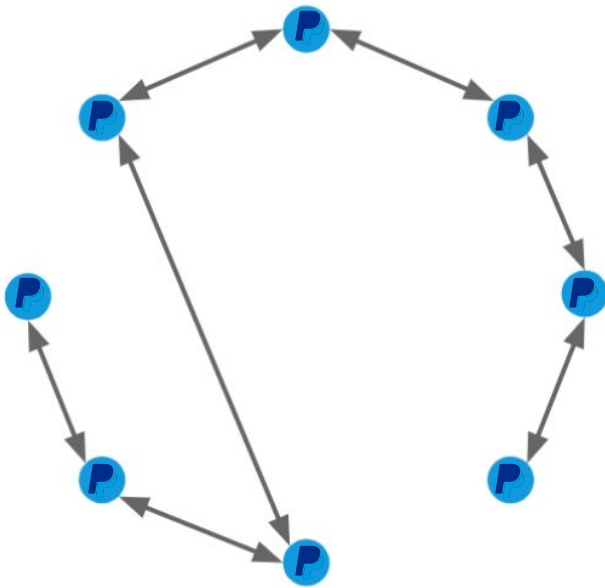

High network density
Think LinkedIn

How dense is your network? How dense could it be?

Aim for high network density to revolutionize meetings and events

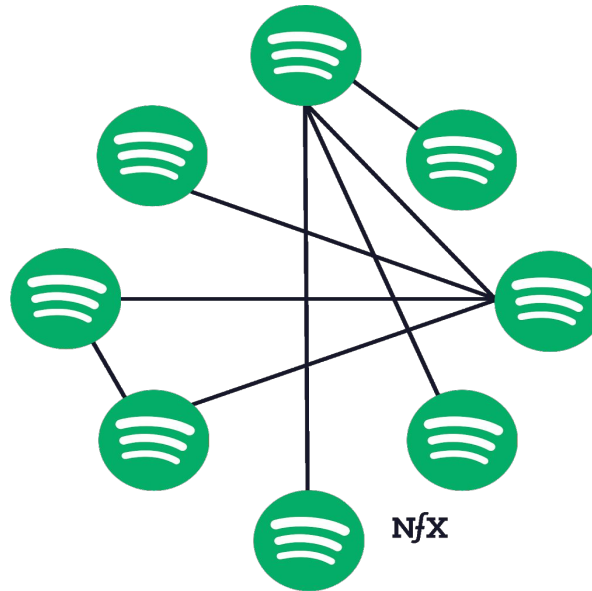

*Sparse network density
Think Paypal*

Pre-covid situation:

- Single-off physical events
- Low investment in digital tools
- Low to no interactive networks

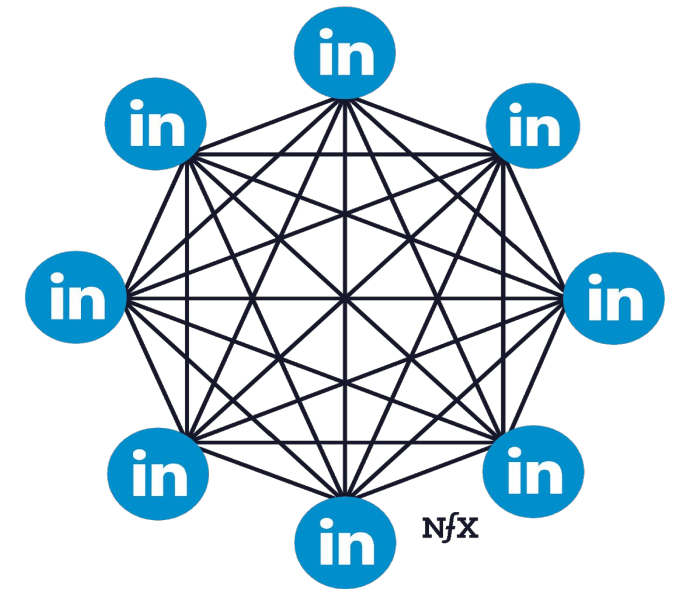

*Low network density
Think Spotify*

Pivoting in-Covid:

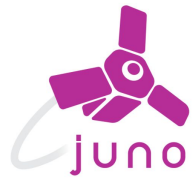

- All events go digital
- Increase investment in digital tools
- Low density network tools emerge

*High network density
Think LinkedIn*

Now

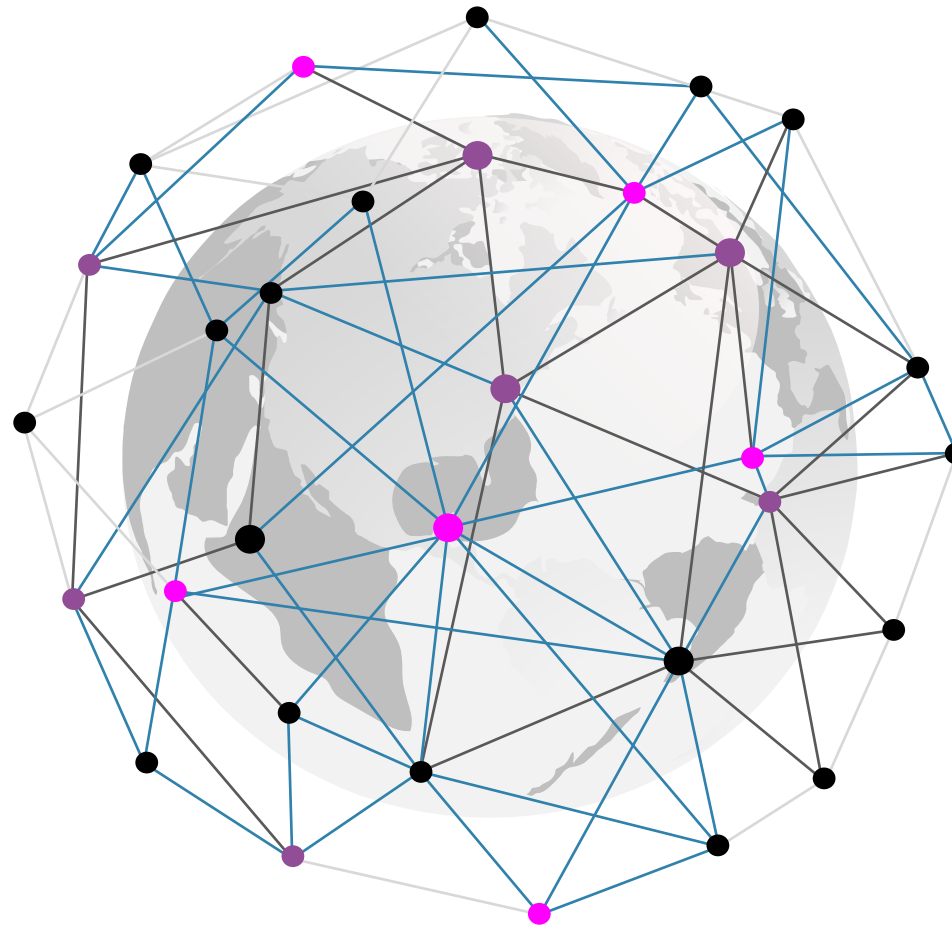

- All events go hybrid
- Year-round investment in digital tools
- High network density!

JUNO network density structure creates unmatched Intersections of Connectivity

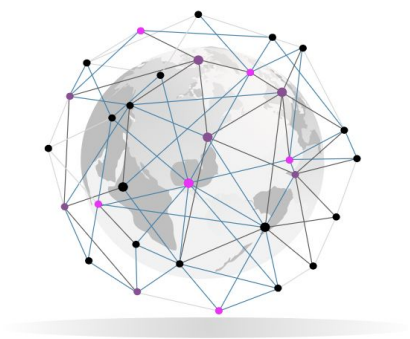

Powerful **User Identity tags** for engagement matching

Cross-border **Network Bridges** to enable scalable network effect

Dynamic **Interactive Networks** offer 1:1 and 1:many relationships

High **Network Density clusters** support frequent engagements

Push your organization to higher network density
